PROFESSIONAL SUMMARY

Associate Software Engineer with 1+ year of professional experience developing full-stack web applications, RESTful APIs, role-based systems, and third-party integrations. Experienced with TypeScript, React.js, Next.js, Node.js, Go, PostgreSQL, MongoDB, and SQL. Contributes to production software development across frontend and backend services, with experience in debugging, API integration, database development, and Agile engineering practices.

PROFESSIONAL EXPERIENCE

BotCalm (PVT) LTD | Matara, Sri Lanka

Associate Software Engineer

September 2026 - Present

Full Stack Engineer (Trainee)

September 2025 - September 2026

- Build end-to-end features in React.js, Next.js, TypeScript, Go, and Node.js, following the team's scalable architecture patterns.
- Design and implement RESTful APIs and third-party integrations that extend product functionality.
- Take part in code reviews with senior engineers and contribute to architectural decisions on production systems.
- Model data and optimize queries across MongoDB and SQL databases.
- Work in Agile sprints using Git and GitHub for version control.

Key Project: Vesant – Compliance Management Platform

2026 - Present

Next.js, React.js, TypeScript, Go, REST APIs, PostgreSQL, Shufti

- Developed and maintained frontend features for the Vesant compliance platform using Next.js, React.js, and TypeScript.
- Worked across frontend and backend services to implement features, investigate defects, and resolve issues.
- Integrated frontend workflows with REST APIs and backend services to deliver end-to-end functionality.
- Implemented Shufti and other compliance-related integrations within application workflows.
- Used WSL and Linux-based development environments for backend development, debugging, and local service workflows.

Web User Interface Developer (Volunteer)

October 2024 - January 2025

Irrigation Department, Southern Province | Galle, Sri Lanka

- Built full-stack web application features using React.js, TypeScript, and Node.js, with a focus on scalable architecture and responsive UI.
- Developed RESTful APIs and integrated third-party services; worked across MongoDB and SQL for data management.
- Followed Agile practices with Git and GitHub, prioritizing performance, accessibility, and maintainable code.

PROJECTS

HR Management System – BotCalm

2025 - 2026

React.js, Next.js, TypeScript, Node.js, n8n

- Developed frontend features using React.js, Next.js, and TypeScript for employee and recruitment management workflows.
- Built and integrated backend REST APIs using Node.js to support HR and recruitment functionality.
- Implemented n8n automation for CV filtering, streamlining the candidate screening workflow.
- Integrated frontend components with backend APIs to deliver end-to-end HR management functionality.

SpeakUP – Citizen Complaint Management System (Final Year Project)

2025

MongoDB, Express.js, React.js, Node.js

- Built a full-stack MERN platform handling all complaint types, improving citizen-government communication in Sri Lanka.
- Supported anonymous and identified complaint submissions with secure file uploads and location tagging.
- Built role-based dashboards enabling officers to manage, track, and respond to complaints.
- Added chatbot assistance, real-time status updates, and analytics, with scalability and privacy as core design goals.

ExpenseTracker – Cross-Platform Mobile Application

2026

React Native, NativeWind

- Built a cross-platform mobile expense tracker to develop React Native skills.

- Implemented expense entry, categorization, and state management with a component-based UI.
- Styled with NativeWind, applying mobile UI/UX and reusable component design principles.

Management System Integration – Self-Directed Project

2025

TypeScript, Next.js, REST API Integration

- Built a management system covering CRUD operations, REST API integration, and client-server communication.
- Implemented authentication and role-based access control for secure multi-user use.
- Applied reusable components and scalable architecture principles throughout.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Go, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, React Native, Responsive Design, UI/UX, Component-Based Development

Backend: Node.js, Express.js, RESTful APIs, Microservices, API Integration

Databases: MongoDB, MySQL, PostgreSQL, Database Design, Query Optimization

Tools and Platforms: Git, GitHub, Docker, Docker Compose, Postman, VS Code, MongoDB Compass, npm, Yarn, n8n, Shufti

Environments: Linux, WSL, Chrome DevTools

Engineering: Full-Stack Architecture, System Integration, Agile Development, Code Review, Debugging, Technical Documentation

EDUCATION

Higher National Diploma in Information Technology

2023 - 2025

Sri Lanka Institute of Advanced Technological Education (SLIATE)

- Coursework in software development, databases, web technologies, and system analysis, with hands-on programming and full-stack projects.

BSE (Hons) in Software Engineering - Coursework

2022 - 2023

The Open University of Sri Lanka

- Studied software engineering fundamentals, software development, databases, web technologies, and system analysis.
